1 What is TCP and why a phone call is must?

I have discovered zero of Political Arithmetic, and this zero will simply much of the Political Mathematics. I have proposed a mere 3 line law named as TCP. It only needs the signature of PM or CM, no legislation is required. This 3 line proposed law is capable of reducing poverty, reducing corruption in police, reducing corruption/nepotism in courts, improving education and that in all within mere 4-6 months only !! Now if such a law existed, then how come no eminent intellectual discovered it till now? I will explain all this later.

2 The draft of the proposed TCP (Transparent Complain Filing Procedure) law

The proposed TCP law has only 3 clauses, as follows. The 3rd clause is a mere declaration. So proposed TCP law has only 2 operational clauses.

#	Officer	Procedure
1	Collector (or his clerk)	The Government hereby orders Collector that if a woman voter or dalit voter or senior citizen voter or poor voter or farmer voter or ANY citizen-voter submits a Right to Information application or complaint against corruption or any affidavit to Collector and demands to be put on website of the Prime Minister, the Collector or his clerk will issue a serial number and put it on PM's website for fee of Rs 20 per page.
2	Patwari (i.e. Talati, or his clerk)	The Government hereby orders Patwari that If a woman voter or a dalit voter or a senior citizen voter or a poor voter or a farmer voter or ANY citizen-voter comes with voter ID, and specifies Yes-No on an RTI application, complaint or any affidavit submitted in clause-1, the Talati will enter his Yes-No on the PM's website with his voter-ID and give a printed receipt for Rs 3 fee. The Talati will also allow citizen to change his Yes-No for Rs 3 fee. The fee will be Re 1 for BPL card holder
3	---	The Yes-No count will not be a binding on PM, CMs, officers, judges etc. Though if over 37 crores women voters, dalit voters, senior citizen voters, poor voters, farmer voters or ANY 37 crore citizen-voters register Yes on a given affidavit, then the PM may or need not take necessary action on the RTI application affidavit ; or the PM may or need not resign. PM's decision will be final.

I summarize the TCP law as

- If a citizen wants, then by visiting Collector's office, he can put his RTI application etc on PM's website Rs 20 fee.
- If a citizen supports and RTI application, complain etc, then by visiting Talati's (Lekhpal, Patwari etc) office, he can register his support (YES) over an RTI application etc on PM's website for Rs 3/- fee.
- The YES-count is not a binding on PM etc.

3 Is that all? Why is a phone call must to understand TCP?

Yes, that's all. Nothing more. So now the question is : how can such a mere three line law solve daunting problem of poverty? How can it solve equally tough problems like corruption in policemen/judges?

A complete proof that this 3 line proposed law is capable of solving EVERY problem that West has solved runs into some 300 pages and I have written this in form of various articles on <http://rahulmehta.com/301.pdf> . But IMO, a reader will be able to understand only via a discussion over phone and not via written articles alone. Why is a discussion over phone a must? After all, Mathematicians can explain theorems via write-ups alone. So cant I explain the proposed TCP and other laws by write-ups alone? No. Because when any new law is proposed described, a reader will almost always have valid questions about possible "adverse side effects" on other areas of society, and efficacy. E.g. Say one proposes POTA to reduce terrorism, one may have valid concerns on side effects such as "won't this law increase corruption in police?". And one can also have questions on efficacy – "will this law really reduce terrorism by even 1%"? And unless these valid concerns on "side effects" are answered immediately, the reader will lose interest in reading the proposed laws further. In Maths, theorems and equations don't have "side effects" and strength. E.g. a theorem on Triangles is not 97% correct, it is always 100% correct. And theorem on Triangle wont adversely impact Circles. And so questions on strength and side effects will seldom arise in the minds of readers while reading write-ups on Maths. So write-ups alone are sufficient when proposals are have no side effects like in Maths. But if a proposal is believed to have side-effects, write-ups alone wont help no matter how much time I spend on making the write-ups. Interactive discussions are must.

This write up is only a summary of the proof that my "proposed 3 line law can reduce poverty, corruption in police etc in just 4-6 months". It doesn't answer 100s of questions they may arise in different 100s of readers. An interested reader is welcome to call me on 98251-27780 or call any of my volunteers. Ph# of volunteers are in orkut community listed above and he is also welcome to visit us F1/A, Supath-2, Juna Vadaj Bus Stand, Ashram Road, Ahmedabad-14 (Sunday 10am to 2 pm or by appointment.)

4 Do all citizens in India have internet to use this law?

This is the most common "wrong question" I get. I call it wrong question, because the law does NOT at all require the citizen to have an internet connection begin with. Whether the citizen has internet or not, he must visit the Collector's office in person to submit his complaint or RTI application. And whether he has internet or not, he must visit Talati's (Lekhpal, Patwari, VO) office in person to register YES on a complaint or affidavit. So internet is not at all required to use this law, and even if a person has internet, it would make no difference. So the law can be used by all citizens of India above 18 years of age. If he has internet connection, he can read the affidavits with ease. But then so can someone without internet --- he only needs to ask someone who has net.

5 How does TCP law reduce poverty within 3-4 months?

The day PM signs this TCP law, I will be submitting about 200 affidavits. The first affidavit is what I call as MRCM – Mineral Royalties for Citizens and Military. The MRCM affidavit is a 7 page proposed law listed at http://rahulmehta.com/mrcm_demand_03.htm . The proposed MRCM law creates an administrative system by which each citizen DIRECTLY gets mineral royalties and land rents from GoI plots. E.g. Say in Dec-2008, the mineral royalties and land rent from GoI plots was Rs 30000 cr. Then as per the proposed MRCM law, Rs 10000 will go towards Military. And for rest Rs 20000 cr, each citizen will get about Rs 200 deposited in his local SBI account or local post office bank account. If each of the adult citizen of India visits bank once a month to withdraw the cash, only about 100,000 clerks will be needed. Well, existing SBI has staff of over 300,000 and all PSU banks together have staff of over 600,000. So the staff needed to support MRCM is not very large.

As this point, I will ask question to the reader. Please read rest of the article only after answering this question.

Background information for the question:

1. Say PM has been forced to sign TCP law.
2. Say I have submitted MRCM affidavit which says that mineral royalties and land rent should directly go to citizens
3. Now in some other article, I have explained how 10s of crores citizens of India will come to know about the proposed MRCM affidavit after it gets submitted.
4. Of the 72 crore adult citizens of India, for the purpose of this question, please consider the economically bottom 80% i.e. economically bottom 58 crore adult citizens of India.

My first question to the reader : How many of these 55 crore citizen-voters, who are at economic bottom, will say – I do not want this Rs 200 per person per month or whatever may be the amount and let this money go into GoI account?

Please read further ONLY after answering the above question. My answer is – less than 5% will say that I do not want this Rs 200 per person per month. So now most of the citizens in bottom 55 crores of the 72 crore adult citizens will have one main thought --- what do I lose? Only Rs 3/- and nothing more. A shot in dark, and what PM actually signs MRCM law, and then I may actually get Rs 200 per person per month.

Now I have another question to the reader. The background information for the question is as follows :

1. Say PM has been forced to sign TCP law.
2. Say someone has submitted MRCM affidavit and 40 crore to 50 crore citizens have submitted YES on it
3. Please re-read the clause-3 of the TCP law. The clause clearly says that even if all 72 crore citizens submit YES on an affidavit, then also the PM is not at all required to sign the law proposed in the affidavit

My second question to the reader is : Do you think that PM will dare to say that “I will not sign MRCM law”? i.e. Will any PM dare to defy the YES from 40 crore or 50 crore or more citizens?

Please read further ONLY after answering the above question. My answer is – PM will sign the MRCM law. Why? Because each citizen who has registered YES knows that he has 50 crore fellow citizens supporting his demand, and so they will confront PM openly thru means they see legitimate. And PM knows that citizens will agitate and he also knows that his 15 lakh policemen cant stop so many citizen. So PM out of fears will not dare to defy so many citizens.

So within 1-2 months after TCP law comes, the citizens will be able to force the PM to sign MRCM law. And within 1-2 months after MRCM law is signed, the citizens will start getting mineral royalties and land rent from GoI plots, and thus poverty will reduce. Later, the tax reforms suggested will increase industrial production and remove poverty completely. These tax reforms are enumerated in <http://rahulmehta.com>

6 How does TCP law reduce corruption in police?

My third question to the reader : Why is corruption in US policemen low (except in drugs related cases)?

The one and only one reason why corruption in US police is low is because citizens in US have procedure to expel District Police Commissioner of their district. So Police Commissioner in US takes very less bribes and also ensures that his staff doesn't take much bribes. If Police Commissioner in US comes to know that his junior staff is taking bribes, he will immediately run a sting operation, gather evidences and gets them expelled. Because he fears that if corruption in junior staff increases, the citizens may expel him. The corruption in US police in drugs related cases is because most citizens in US do not have much aversion against drugs. But since in India, citizens have NO procedure to expel Police Chief, the Chief not only collects bribes, he asks his juniors to collect maximal bribes. A typical Police Commissioner keeps half of what he collects and passes the half to MLAs, Home Minister and CM. How come you, the reader, did not know that US citizens can expel their Police Chiefs? Because the EIIs (EII = Eminent Intellectuals of India) do not want citizens of India to know that “US citizens have procedure to expel District Police Chiefs” because

EIIs don't want citizens of India to demand such procedures.

I have prepared the draft of law, which when signed by CM will create a procedure by which citizens of district can replace the District Police Commissioner. I call this draft as DPC-RP i.e. District Police Commissioner Replacement Procedure. The draft is 100% consistent with the each of the 33 dozen Articles of our Constitution and all existing laws.

My 4th question to the reader is : Will any CM of India sign a law allowing citizens to replace DPC? My answer is : NO. Because if citizens get procedure to expel Police Commissioner, then the Commissioner's will have to reduce his monthly bribe collection from Rs 1 crore to mere Rs 1 lakh. And in that case, the monthly hafta Police Commissioner gives to MLAs, Home Minister and Chief Minister will also fall from Rs 50 lakh to mere Rs 50,000. And so MLA, Home Minister, CM etc as of now will refuse to enact a law that would allow us commons to replace District Police Chief.

But the game changes after PM is forced to sign TCP. Say PM has passed TCP. Then second affidavit I will be submitting will be DPC-RP affidavit. Most citizens will think "if this DCP-RP reduces the corruption in police even by 5%, my Rs 3 is vasool". And the biggest reason that will motivate citizens to register YES on DPC-RP is hatred against corrupt policemen, who make lakhs of rupees a months, while a common man barely makes a few thousand a month after hard labor. So again, if 70% to 80% of citizens of a State register YES using clause-2 of TCP, the CM out of fear will mellow down, lose all his bravado and will sign DPC-RP law. The fear of losing job is Supreme in a govt. officer or a judge. So within 14 days after citizens get procedure to expel District Police Commissioner, the corruption in Police Commissioner as well as other policemen will reduce by over 99%. Thus within 3 months after TCP passes, corruption in policemen will become near-zero.

Right to Recall Police Chief. is just beginning. Next comes by which citizens can replace PM, CM, MLAs, MPs, Supreme Court Chief judge, High Court Chief judges, Reserve Bank Governor, State Bank Chairman, District Education Office, Mayor and officials at 251 positions at National, State and District levels. Which recall law do you think citizens will oppose? My answer is : NONE. So after TCP passes, chances are very high that within 6 months citizens will force PM to enact replacement procedures over 251 positions. And so corruption in all these positions will end for good.

7 Summary

I have explained how mere 3 line TCP law will reduce poverty, corruption in policemen etc. The interested reader is welcome to phone me on 98251-27780 or visit me at F1/A, Supath-2, Juna Vadaj Bus Stand, Ashram Road, Abad-14 (Sun 10am to 2 pm). And if you like this law, please do sign the petition at <http://www.petitiononline.com/TCPen> . This first small step is extremely important to get this TCP law passed.

My (author's) brief introduction : I, Rahul Chimanbhai Mehta, was a candidate in Gandhinagar Loksabha election in May-2009. election. I got 7300 votes, and was 4th rank (Ms Mallikaben got 3rd rank with 9300 votes). My sole goal is to get the proposed TCP law passed and also later enact MRCM law and enact Right to Recall laws in India. MRCM law will reduce poverty in 3-4 months and Right to Recall PM, CM, judges etc laws will reduce corruption in 2-3 months. I am forming RRP i.e. "Right to Recall Party" to campaign for these laws. I need your time to get these laws enacted.
